CAREER OBJECTIVE

Motivated Software Engineer with hands-on experience building full-stack and AI-powered applications using Next.js, Node.js, and Python. Strong foundation in Data Structures, OOP, and REST API development. Seeking an entry-level Software Engineer role to build efficient, scalable, and high-performance systems.

EXPERIENCE

Tata Consultancy Services (TCS)

Assistant System Engineer (Offer Accepted) | Joining: July 2026

- Selected through TCS NQT by clearing aptitude, coding, and technical interview rounds
- Confirmed offer for Assistant System Engineer role starting July 2026

EDUCATION

B.Tech in Artificial Intelligence and Data Science

Technocrats Institute of Technology, Bhopal | 2022 – 2026 | CGPA: 7.91

PROJECTS

IdeaBoard — Collaborative Document Platform with AI Integration

Tech Stack: Next.js · React · Drizzle ORM · NeonDB · Firebase · TipTap · OpenAI API

- Developed AI-assisted document editor integrating OpenAI API for LLM-based text suggestions, reducing manual formatting effort by 30%
- Implemented real-time rich-text editing with TipTap, user authentication, and CRUD operations using NeonDB and Drizzle ORM
- Integrated Firebase for real-time data sync and secure session management across multiple users
- Deployed on Vercel with CI/CD pipeline ensuring 99%+ uptime and seamless production releases

CodeFusion — Real-Time Code Execution Platform with Local LLM Integration

Tech Stack: Next.js · TypeScript · Prisma · MongoDB · WebContainers · xterm.js · Ollama · ShadCN

- Built browser-based code editor with real-time execution using WebContainers, eliminating need for local development setup
- Integrated local LLM (Ollama) for AI-powered code suggestions and prompt-driven code generation with low-latency responses
- Designed intuitive developer UI using ShadCN and xterm.js terminal for live command execution within the browser
- Managed user sessions and project data with Prisma and MongoDB, ensuring scalable and reliable backend performance

MandiLive — Intelligent Real-Time Market Data Platform

Tech Stack: React · TypeScript · Node.js · PostgreSQL · REST APIs

- Built full-stack real-time commodity price tracking system covering 15+ markets with live charts and automated price alerts
- Designed and implemented scalable RESTful APIs using Node.js and Express, improving backend response time by 20–25%
- Optimized PostgreSQL queries and schema design for efficient data storage and fast retrieval across large datasets

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, Java, SQL

Frameworks & Technologies: React.js, Next.js, Node.js, Express.js, FastAPI, Tailwind CSS, ShadCN UI, HTML5, CSS3, REST APIs

Databases & ORM: MongoDB, PostgreSQL, MySQL, Prisma, Drizzle ORM, NeonDB, Firebase

Infrastructure & Tools: Git, GitHub, Docker, Vercel, Render, Postman, VS Code, CI/CD

Core Concepts: DSA, OOP, DBMS, OS, Computer Networks, API Integration, Agile, System Design

ACHIEVEMENTS

- Solved 500+ problems on GeeksforGeeks | Solved 250+ problems on LeetCode — strong DSA foundation
- 22-Week Problem Solving Course (160 Days of Problem Solving) — GeeksforGeeks
